Research Statement

My current focus is LLM reasoning and alignment via optimization theory and reinforcement learning design. My areas of expertise include:

1. **LLM Post Training**: Reasoning via RLVR; Alignment (RLHF/DPO); Agent Training.
2. **Optimization/RL Theory**: Optimal Transport; Non-convex Optimization; Minimax Optimization; Zeroth-order Optimization; Multi-agent Reinforcement Learning.

Education

Columbia College, Columbia University — New York, NY
B.A in Mathematics, Computer Science — May 2026
Advisor: Andrew Blumberg (Math), Tianyi Lin (IEOR)

Experience

Research Intern | AI Lab, Princeton University — Princeton, NJ
Hosted by Prof. Mengdi Wang — Feb 2025 – Dec 2025
Topic: LLM RL Reasoning; LLM Agent Training

Research Intern | Institute of Data Science, HKU — Hong Kong
Hosted by Prof. Yue Xie, Prof. Qingpeng Zhang — May 2024 – Aug 2024
Topic: Neural Optimal Transport, Convex Networks

Teaching Assistant | Department of Mathematics, Columbia University
TA for MATH 2500 Analysis & Optimization over SP24, FA24, SP25, FA25, SP26

Publications

Talks

2025 INFORMS Annual Meeting, Atlanta — Oct 2025
Invited Speaker; *LLM Post Training: Turning "Trash" Samples into Value*

Services

Reviewers for: *Conference on Neural Information Processing Systems* (NeurIPS), *International Conference on Learning Representaton* (ICLR), *AAAI Conference on Aritificial Intelligence* (AAAI), *Transactions on Machine Learning Research* (TMLR)
